

# GREECE CENTRAL SCHOOL DISTRICT

**Vote**  
*Tuesday,*  
**December 4**

*rebuild remodel revitalize*

On Tuesday, December 4, Greece residents will be asked to vote on a capital improvement project designed to reshape the future of the Greece Central School District. *Reimagine Greece* will appear on the ballot as a single proposition with three key components.

## rebuild

The district is proposing the construction of a new, shared facility for Transportation and Support Services using the existing Latta Road site along with adjacent land purchased as part of the 2015 capital project. The facility would include space for Transportation, Buildings and Grounds, Facility Planning, Technology, Central Stores, and the Professional Learning Center. It would also include additional parking, more repair bays for fleet maintenance, and designated space for staff training.

## remodel

Renovation and improvement projects are proposed at every school. Work varies by location, but includes general building upgrades, like window replacement, parking lot repairs, HVAC improvements, and security enhancements. Projects like the installation of double entry vestibules and interior notification systems are proposed to increase safety in all 17 school buildings. The goal is to protect the community's investment in our schools by reducing inefficiencies and addressing items that influence health and safety, energy conservation, and code compliance.

## revitalize

Athletic facility upgrades, including synthetic turf playing surfaces and lights, are proposed at all four high schools. Projects vary by site, but include restroom upgrades, baseball and softball field improvements, updated concession stands and ticket booths, new scoreboards and sound systems, added storage, drainage enhancements, and improved field access for spectators and emergency vehicles. These upgrades are designed to limit lost playing time, improve physical education programs, and extend the hours fields are in use thereby increasing community access.

## School Taxes WILL NOT Increase as a Result of This Project

Replacement of retiring debt, state building aid, and use of voter-approved capital reserves make it possible for the \$107,825,000 proposal to be accomplished with **no additional levy increase associated with this project.**

<b>Total Project Cost</b>	<b>\$107,825,000</b>
State Building Aid and Debt Drop-off	– \$92,130,000
Capital Reserves	– \$15,695,000
<b>Tax Bill Increase</b>	<b>0</b>

### What renovations are planned for Athena Middle?

As part of the *Reimagine Greece* capital improvement project, all 17 schools would see renovations that include main entrance security improvements, new public address systems, and ceiling fans in gymnasiums. Here are some of the other projects proposed for Athena Middle School:

- Performing arts center improvements to include new rigging and sound systems, new lobby flooring, some exterior brick replacement, and a new fire alarm system
- Library and family and consumer science room renovations
- Locker replacement
- Forum Room upgrades to include new seating and lighting
- Replacement of existing elevators

- Partial pavement resurfacing
- Ventilation system upgrades
- Installation of a new standby generator system
- Miscellaneous flooring, electrical, lighting, plumbing, and window and door replacement projects

### Are there projects from the last referendum that still need to be done?

Yes, remaining projects from the 2015 referendum will be finished in the summers of 2019 and 2020. At Athena, the work is scheduled for 2020 and includes stadium bleacher replacement, improvements to the pool area, replacement of the ropes course, security upgrades, and miscellaneous ventilation, lighting, and flooring projects. To see a school-by-school list of projects to be completed in the summers of 2019 and 2020, please visit the *Reimagine Greece* section on the district website, [greececsd.org](http://greececsd.org).

### What athletic facility improvements are planned for the Athena campus?

Athletic facility improvements, including the addition of synthetic turf playing surfaces and lights, are proposed for all four Greece high schools. At Athena, projects include:

- A new synthetic turf field with lights, bleachers, a scoreboard, and sound system
- A new ticket booth and entry feature for the athletic fields
- Construction of a new building for concessions, restrooms, and storage
- Softball and baseball field upgrades to include synthetic turf infields, new backstops, batting cages, and drainage improvements
- Improved field access for spectators and emergency vehicles
